THREAT DETECTION THROUGH ELECTROMAGNETICS

The **PD140E** is a Hand Held Metal Detector that combines **high reliability and ergonomics with advanced detection and operator signalling features.**

Effective sensitivity to all metals, full compliance with the latest Security Standards and high immunity to external metal masses are among the main peculiarities of this new device.

COMPACT, ELEGANT, ROBUST AND ERGONOMIC

The **PD140E** features a special ergonomic design consisting of an offset hand grip which ensures that the operator's hand does not interfere with the sensitive detection area. This means fewer scans per person and therefore shorter inspection times per person. Special care has gone into the mechanical design of the detector. Absence of sharp edges or corners allows the detector to be passed smoothly over the inspected area without getting caught in buttons, buckles, folds or other parts of clothing.

NIJ STANDARD 0602.02 COMPLIANT

The technical features of the detector **comply with the NIJ standard 0602.02 and the new NIJ draft standard 0602.03.** The **PD140E** has uniform sensitivity to magnetic and non-magnetic targets including those made of stainless steel.

At the same time the detector offers **excellent body-effect compensation** and has high immunity to external disturbance from electromagnetic and mechanical sources.

FULL DIGITAL DESIGN

The **PD140E** is fully digital. Electronic functions include an inspection field transmitter-receiver based on Digital Signal Processing (DSP) technology. This design, combined with a special printed antenna, ensures **consistent performance, very high reliability and calibration-free operations.**

LATEST PLASTIC MATERIALS TECHNOLOGY

The metal detector casing is made from **next-generation technical polymers.** These plastics offer high chemical resistance and mechanical strength ensuring a long detector life even in heavy duty conditions.
